

prompt[®]
The pursuit of purity

Our beginning

From our humble beginning in 1978 with power tools manufacturing, diversifying into electronic weighing scales and now becoming one of India's leading Dairy Technology company.

How do we keep it pure?

Prompt provides innovative solutions for an efficient dairy procurement supply chain. From farm management and milk collection to quality analysis and preservation, we have different equipment, software and solutions to ensure that the purity of milk is retained at every step.

Where we are today

25+ Years of Exp in Dairy	24 States Presence	55000+ Village Presence
3 Manufacturing Units	3 Patents	3 Patents Pending
74 Service Location	800+ Team Members	50+ Dedicated R&D Team

Today, Prompt is regarded as a pioneer in the industry with products across the entire dairy supply chain. It ensures that the purity of milk is retained throughout.

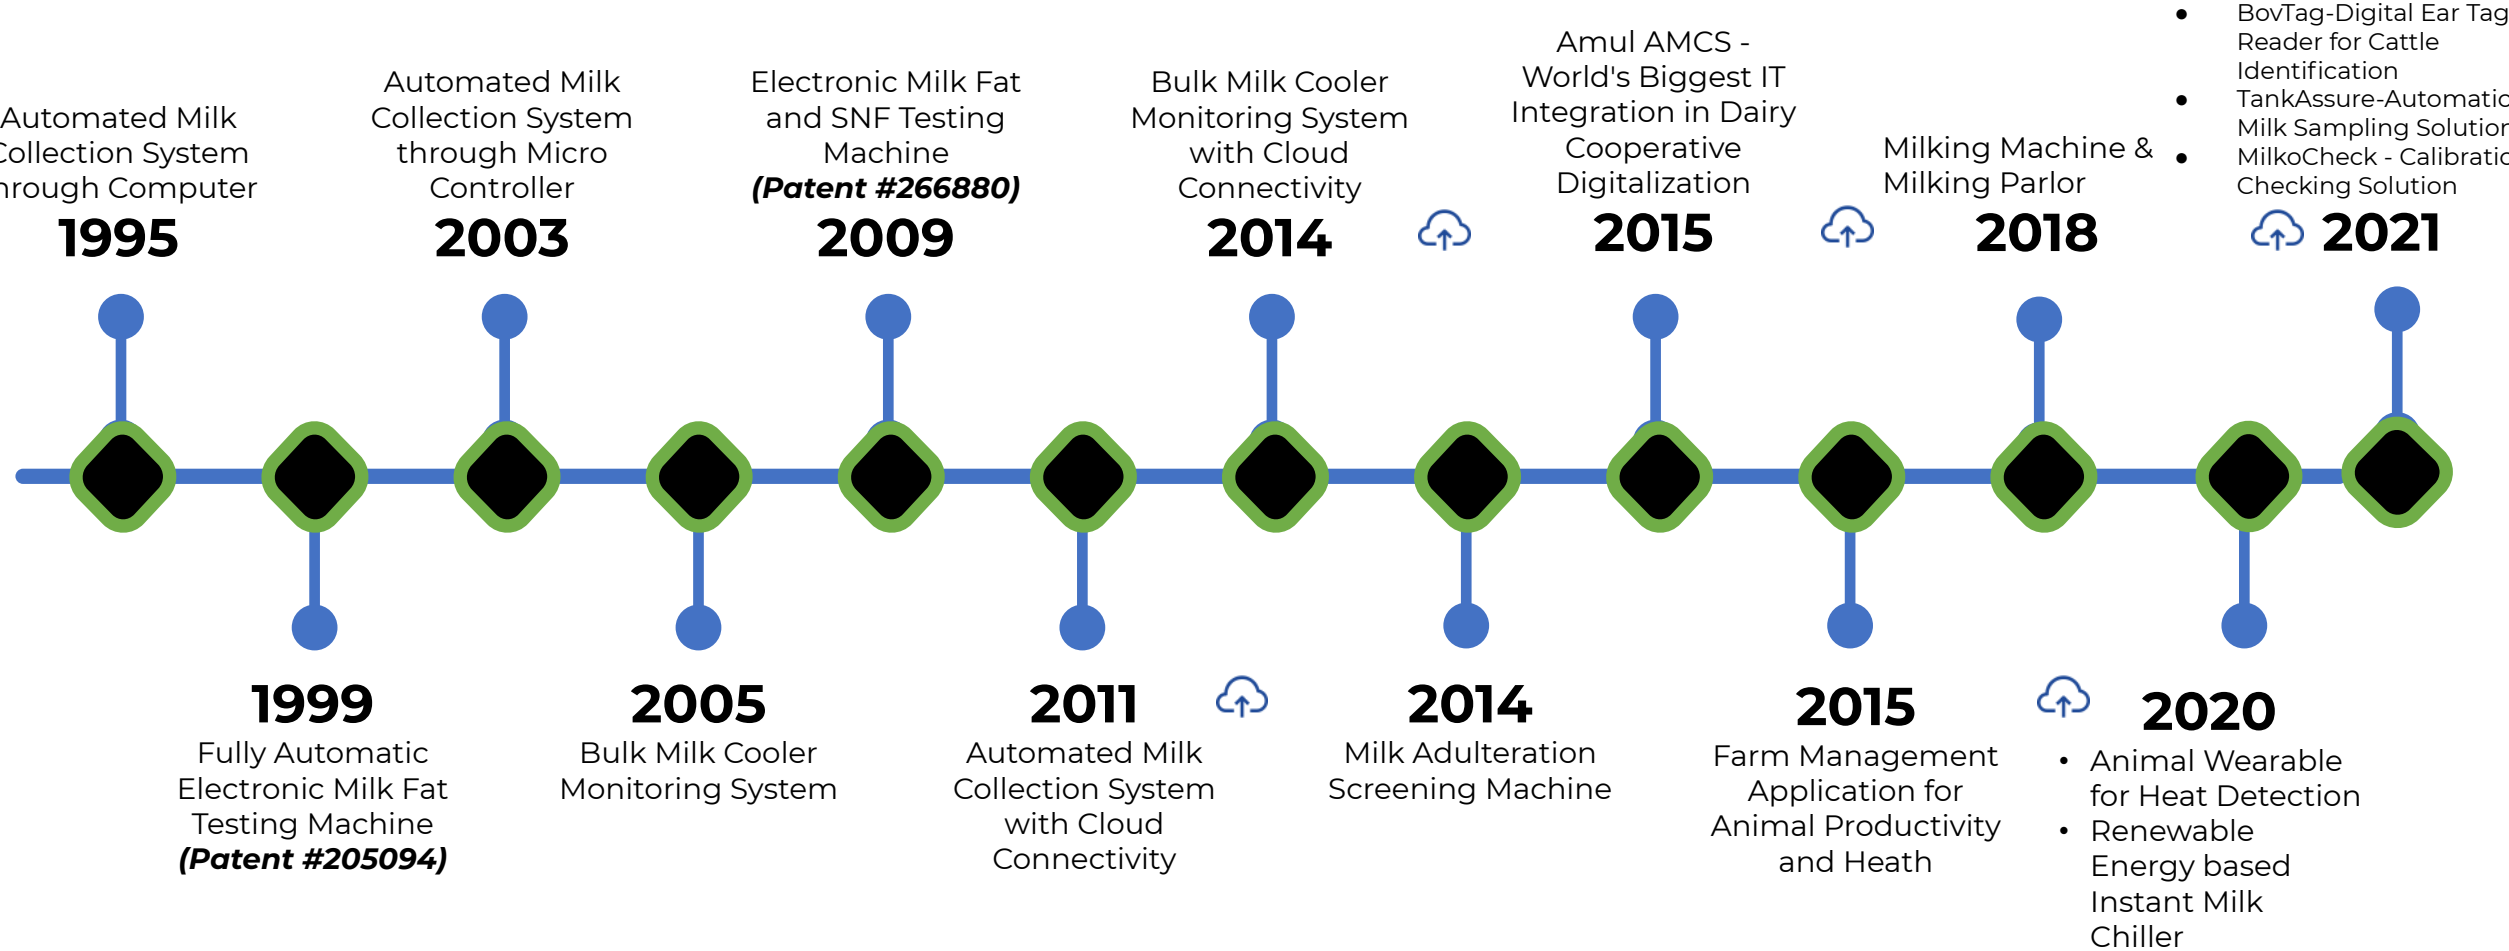

IndiFOSS

IndiFOSS Analytical, one of our group company, was established in 2012 to represent FOSS Analytical, Denmark and Shenzhen Bioeasy Biotechnology, PRC with their high-end products.

IndiFOSS, with a work force strength of 135+ personnel, manages the sales & services of FOSS instruments & Bioeasy Rapid Testing Kits in India, Srilanka and Nepal.

Connecting Products to Technology

Most of our products and solutions are Cloud, IoT and Bluetooth enabled that bring in transparency as well as traceability throughout the supply chain at all levels on a real-time basis

Farm Management Solutions

BovSmart - Animal Wearable Tag

The BovSmart Animal Wearable is a comfortable non-invasive IoT (Internet of Things) solution designed for detecting the onset of the cow's heat cycle with 90% proven accuracy. Developed with a specialized algorithm, it is designed to ensure timely breeding with high-success rates. This heat detection system leads to improved productivity and better animal health. Good cattle health facilitates better quality of milk .

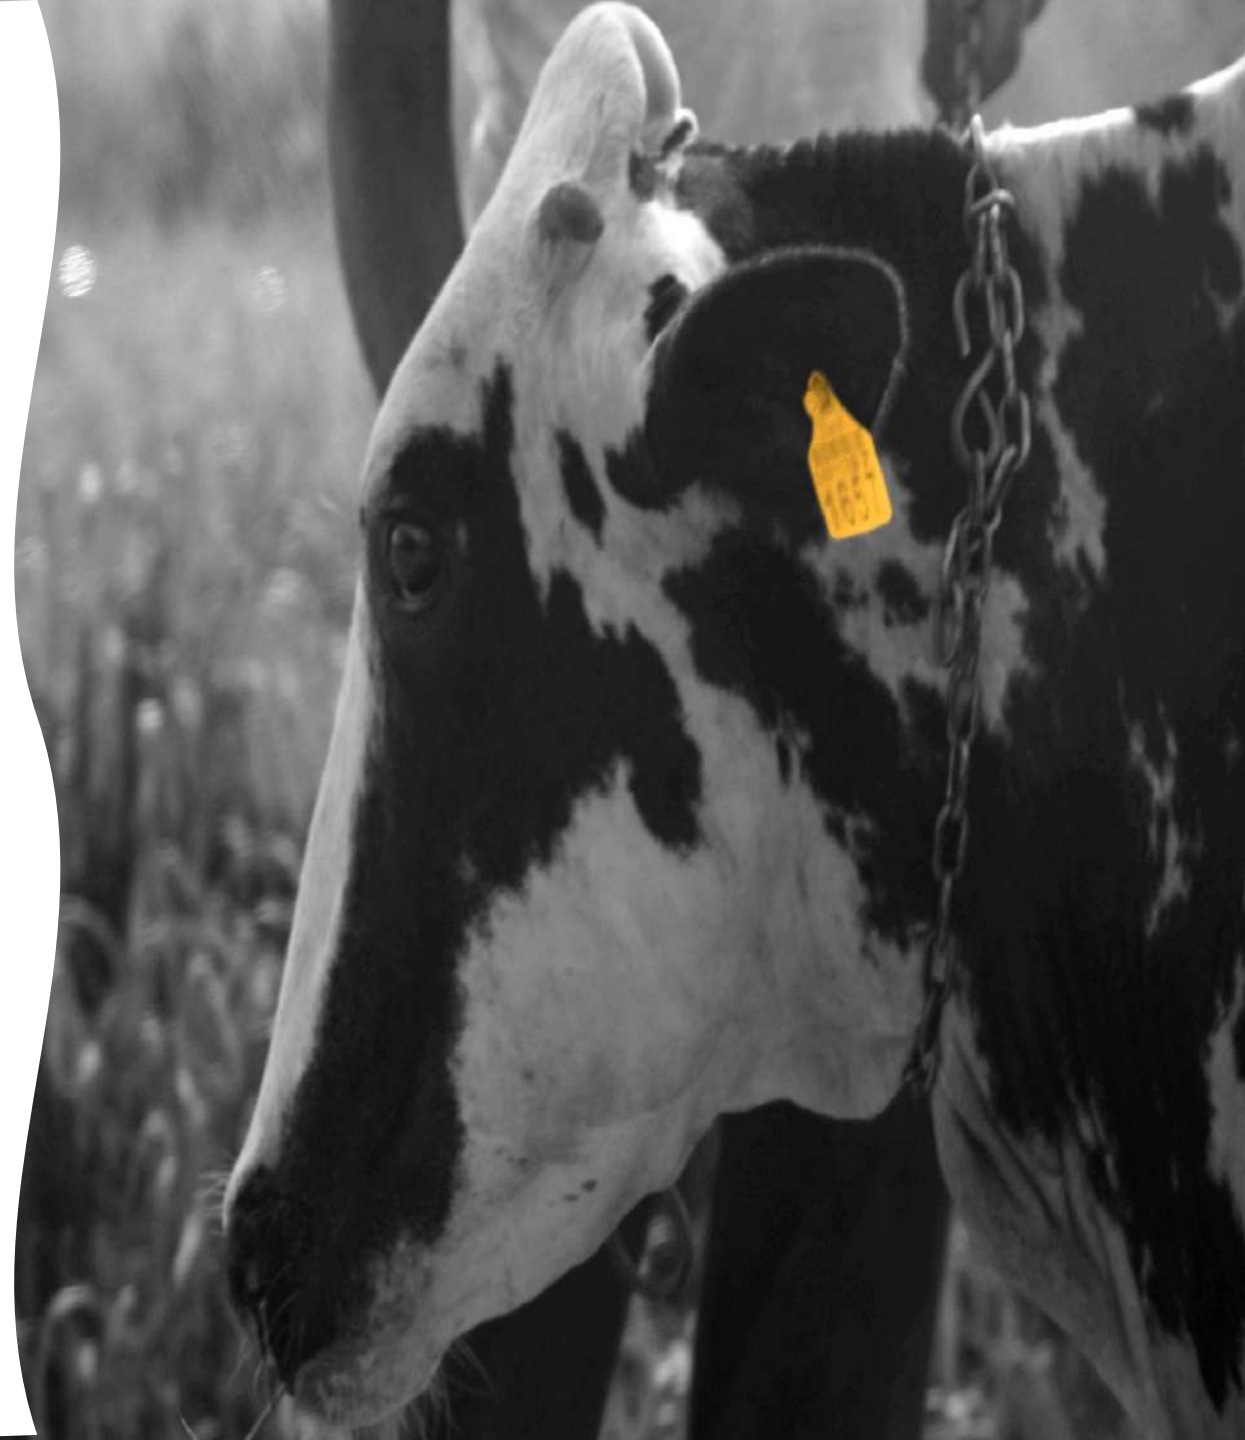

Farm 365 – Dairy Farm Management App

A Central Online, App assisted Farmer Connect Platform for integrating multi-channel farmer centric interactions in a single environment supported by diverse stakeholders for enhancing Farmer Earnings.

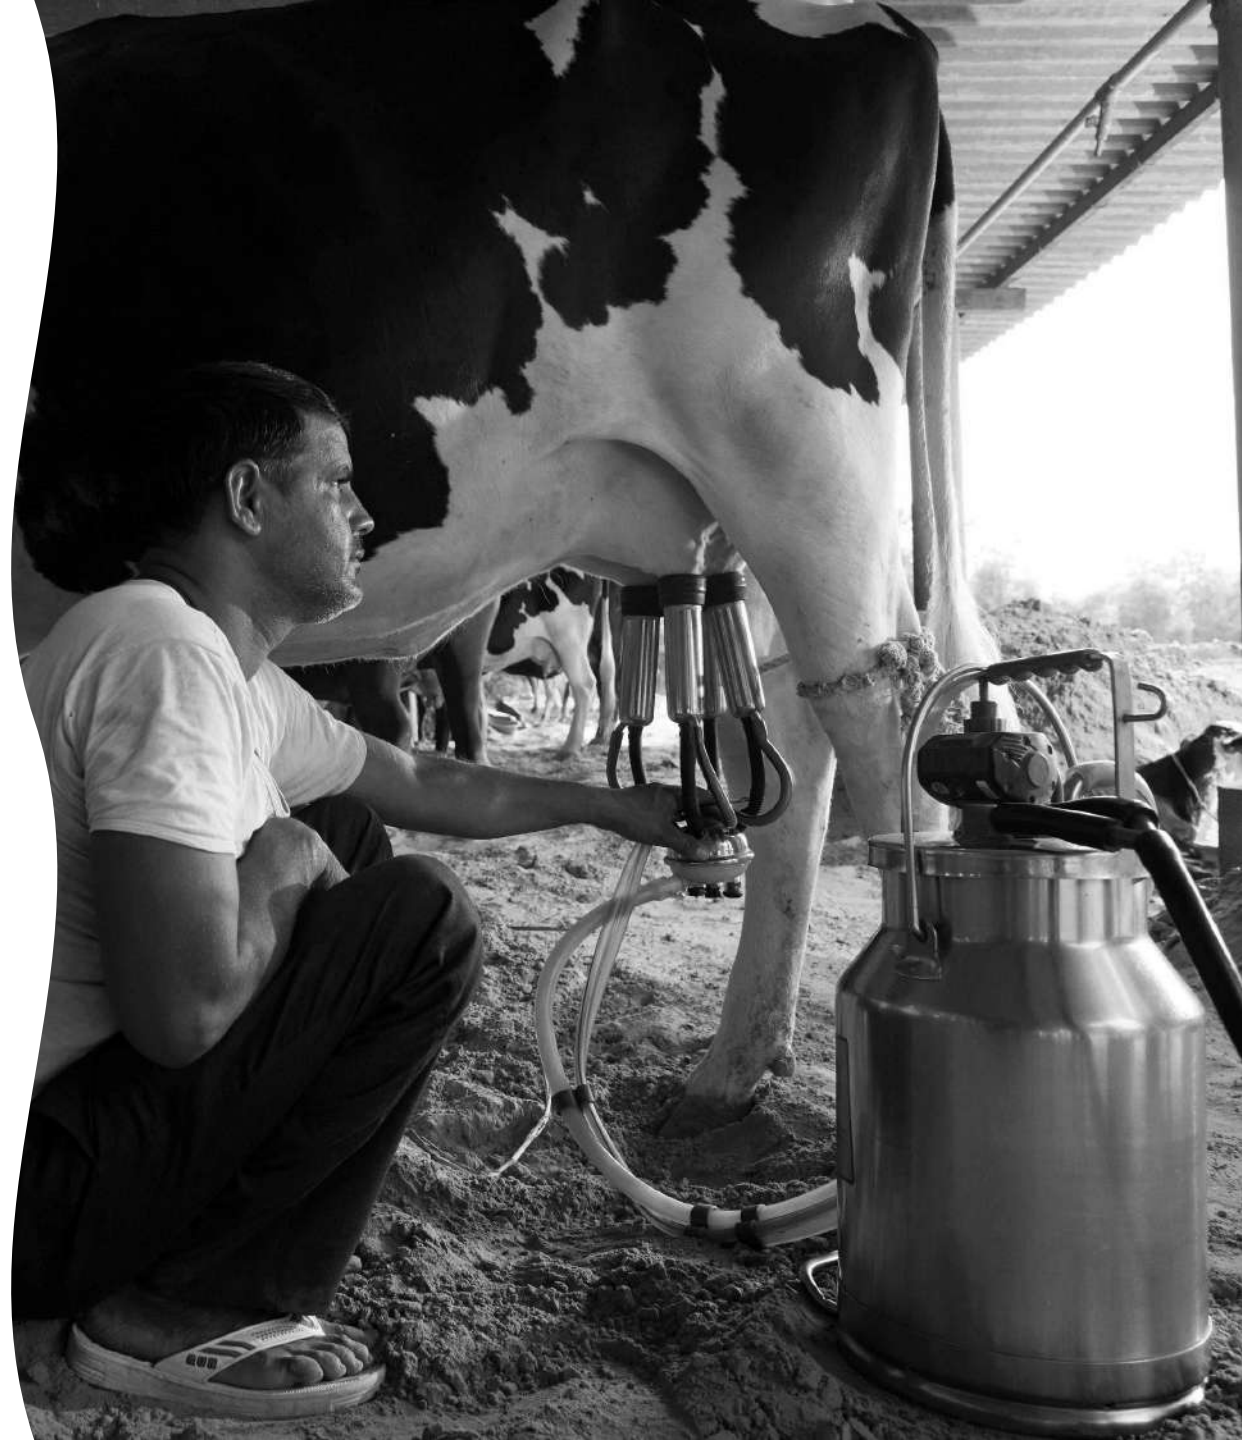

BoVTag - Digital Ear Tag Reader

BovTag makes the hectic process of animal identification simpler and efficient than ever. It captures the image of the existing ear tag of the animal and extracts the unique identification number on it. In addition, it also records the date, time and geo-location from where the data is captured to ensure its authenticity.

MilkEasy Milking Machine

A machine that helps eliminate the contamination that usually happens in the traditional milking process, thereby achieving the minimum bacterial count. Also, the machine milks the animals gently, which avoids any risk of injury to them.

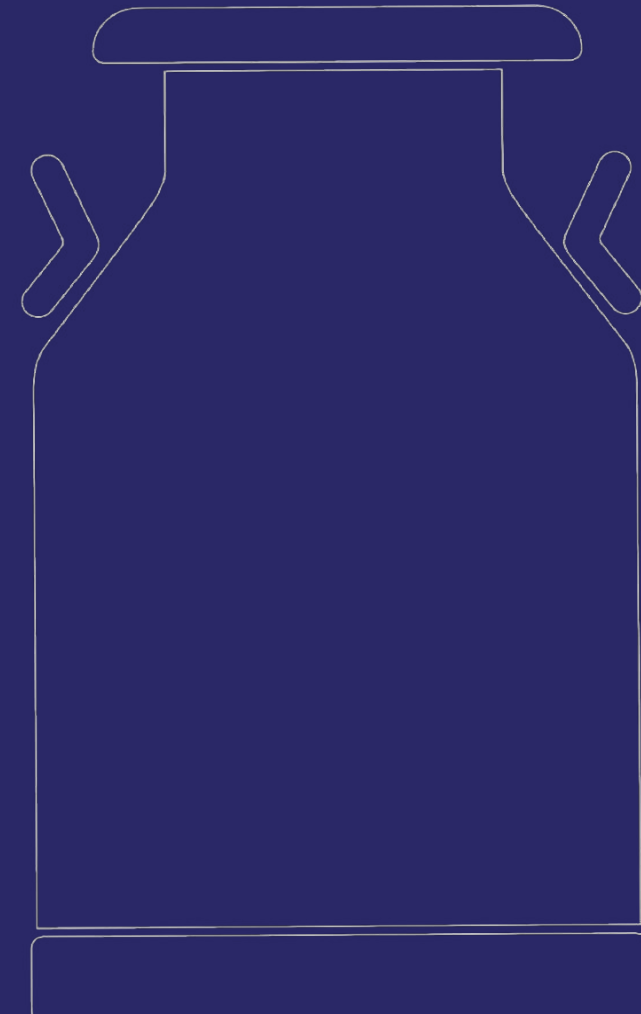

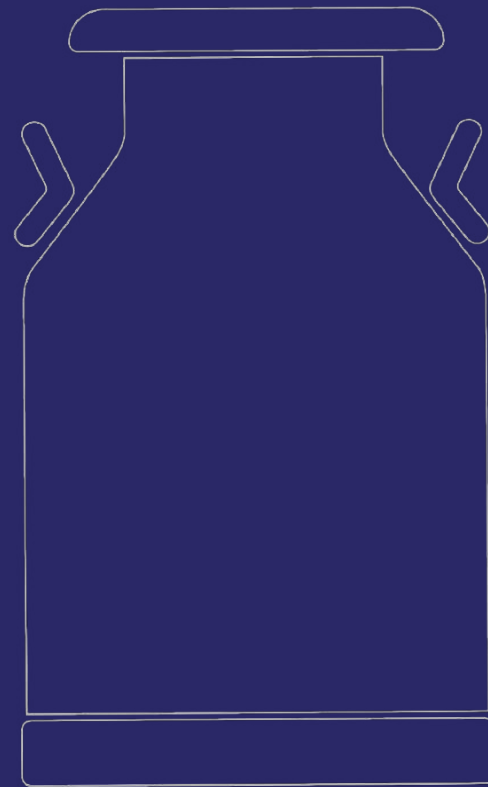

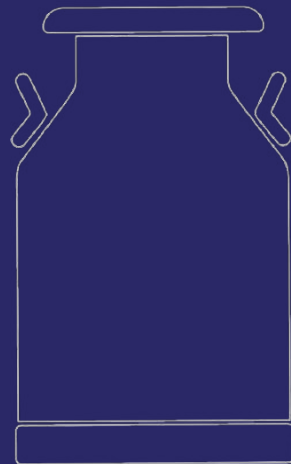

MilkoChill – Instant Milk Chiller

An Efficient, Affordable, 500 LPD backed by thermal heat bank with option to operate using Renewable Energy to Preserve Milk Quality at source.

Milk Procurement Solutions

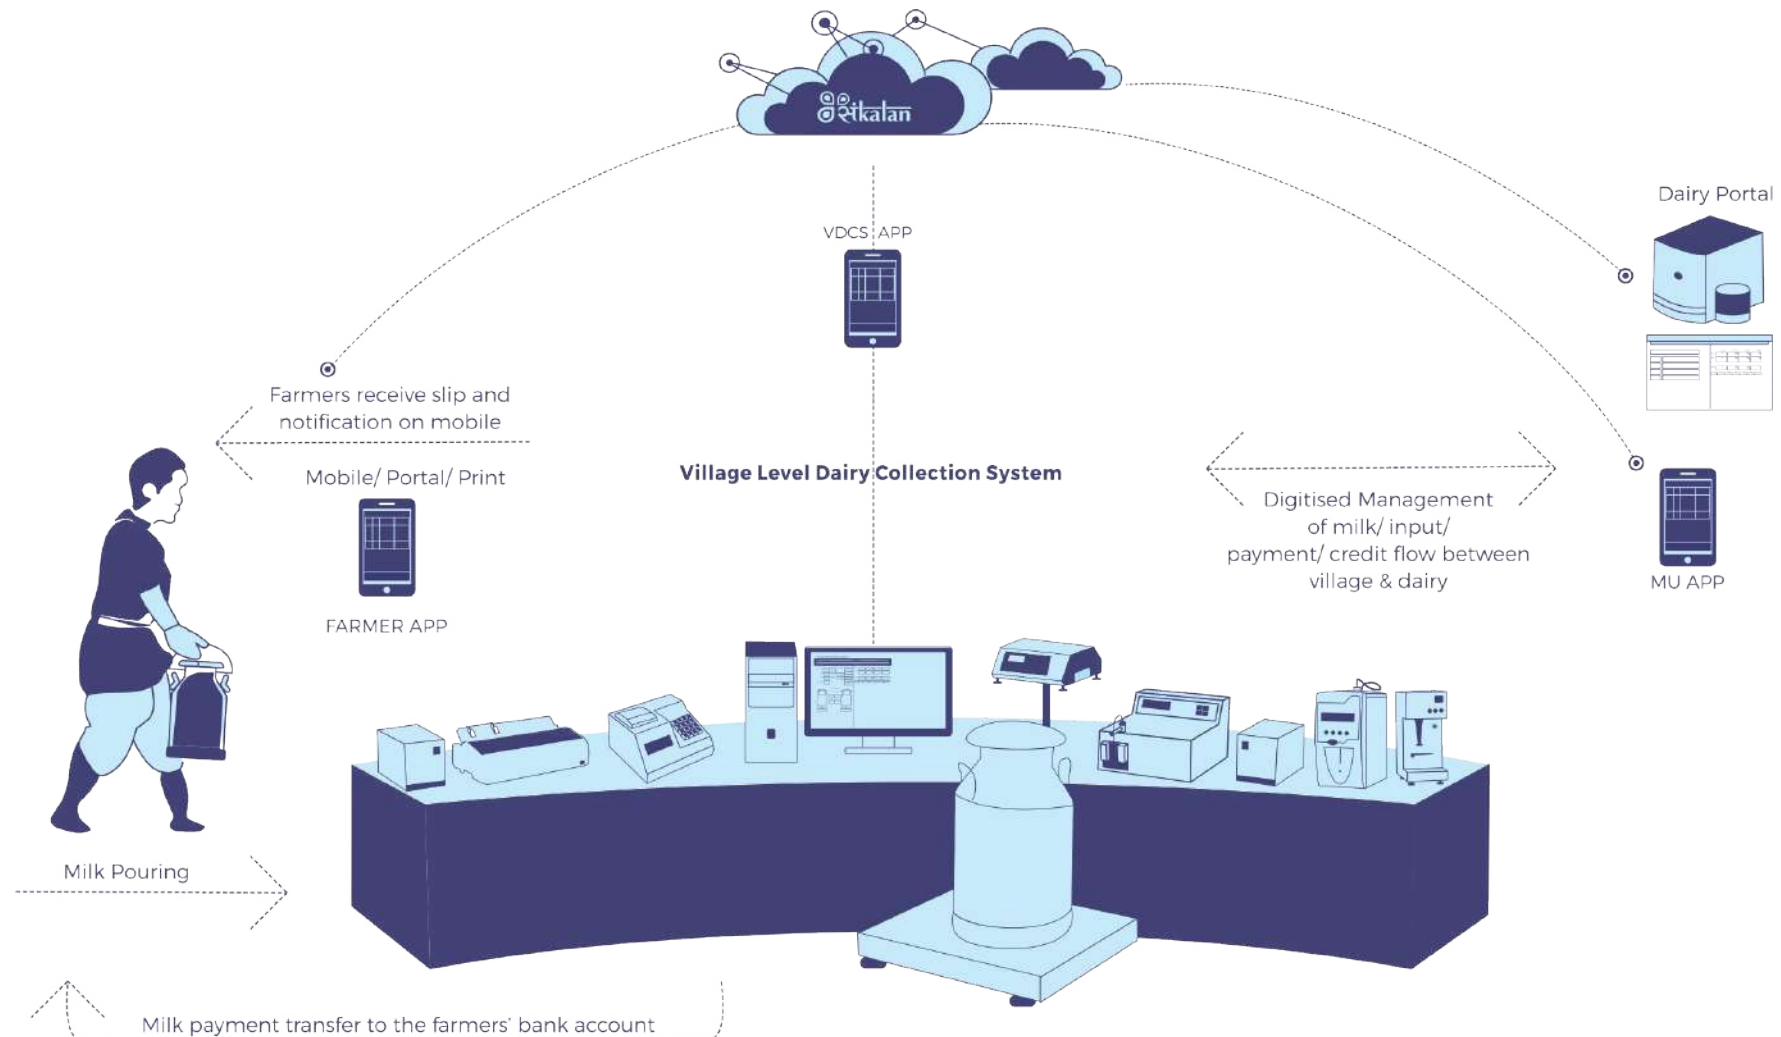

Automatic Milk Collection System

A robust, integrated, multi-platform multilingual software for complete Village level Dairy operations, integrated at Dairy Level to enable Transparency and Key Informatics.

Automatic Milk Collection System

AMUL AMCS

Automatic Milk Collection System is joint initiative by GCMMF (Gujarat Cooperative Milk Marketing Federation - AMUL) and Prompt. It digitally transforms Village Dairy Cooperative Societies by bringing in transparency in their operations to help increase the earning of the milk farmer. This is one of the Biggest IT Integration in the History of Dairy Industry.

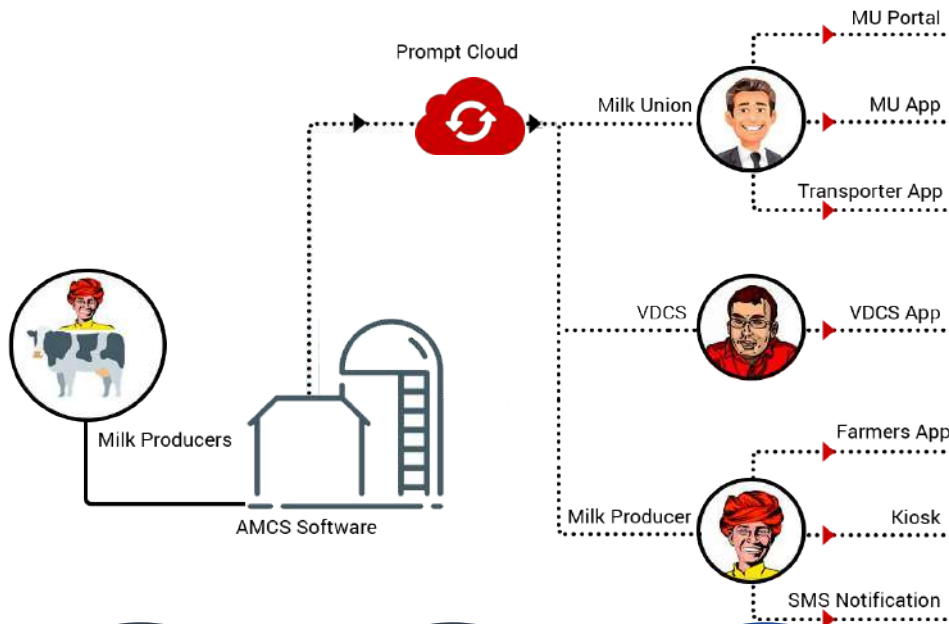

Amul AMCS

Amul AMCS - World's Biggest IT Integration in Dairy Cooperative Digitalization

Features & Benefits

- ✓ Biggest IT Integration in the History of Dairy Industry
- ✓ Transparency between Farmers and Milk Societies
- ✓ A Step Towards Building Cashless & Organized Societies
- ✓ Cashless Payments through Direct Link with Bank
- ✓ Common Digital Platform for Farmers and Milk Unions
- ✓ Easy, Reliable and Efficient Data Management
- ✓ Maiden and Modern Mobile Applications for Farmers
- ✓ Increased and Quick Milk Collection in Less Time

Milk Monitoring Solution

BMC SmartBox-Real Time Milk Monitoring System

A robust, highly configurable system for real-time monitoring of Bulk Milk Cooling operations @ Village level to help preserve quality of the milk during chilling and storage phase, apart from supporting dynamic route planning. Real-time App-assisted alerts are sent out which support timely actions to maintain the purity of milk.

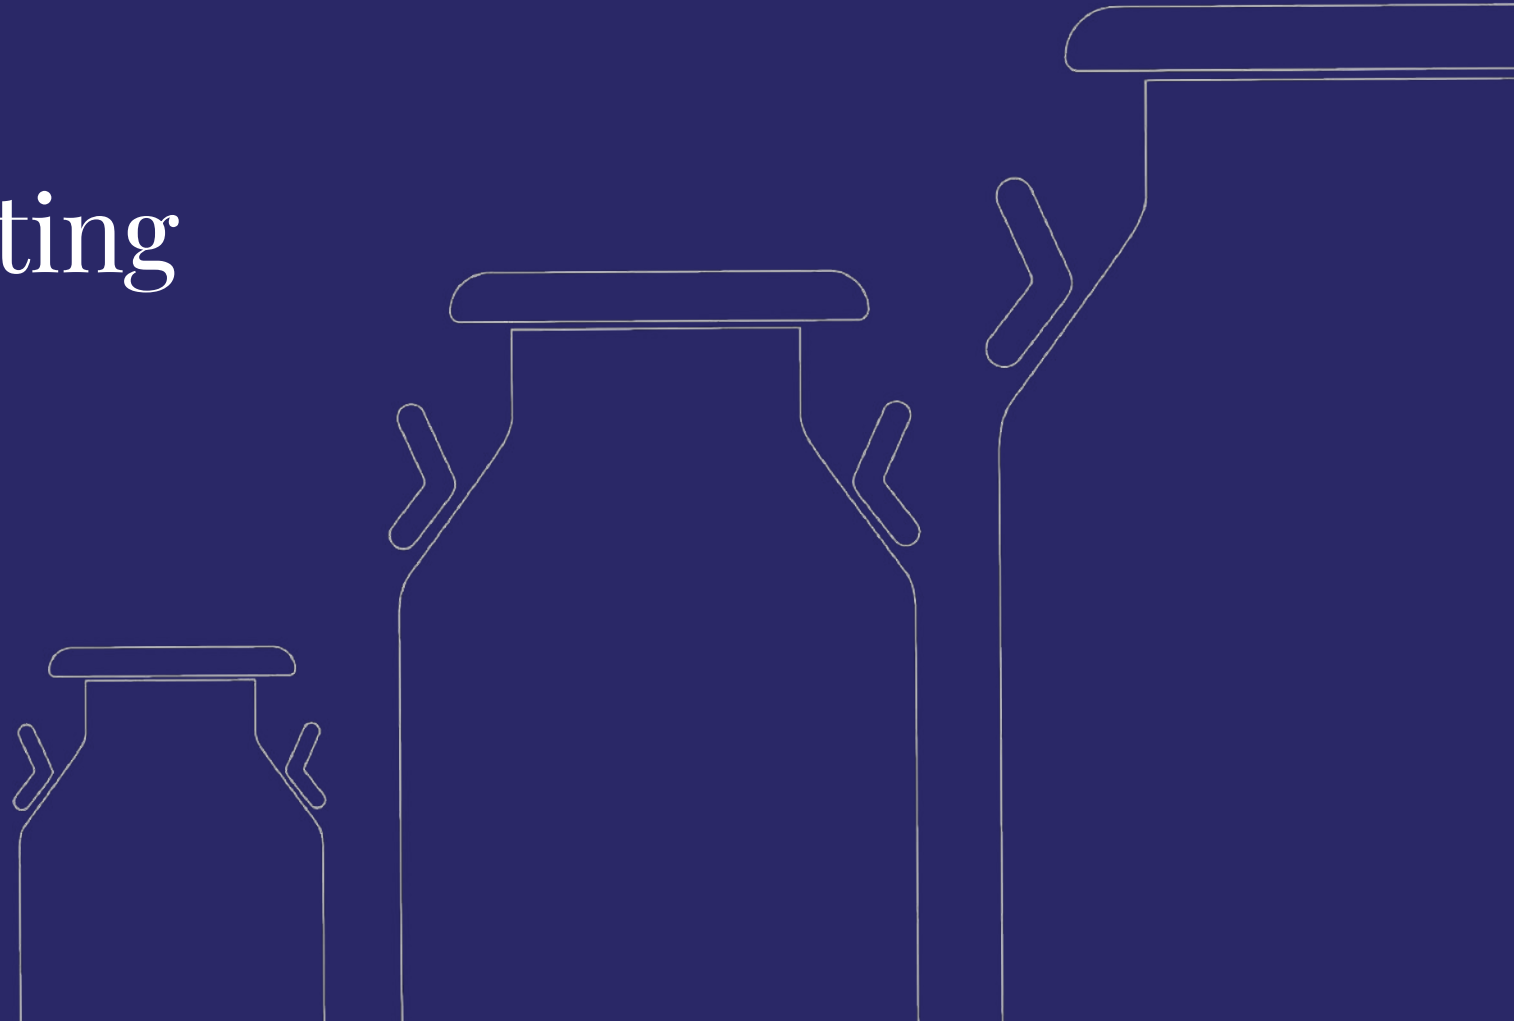

TankAssure – Automatic Milk Sampling Solution

TankAssure is a closed, containerized and digitally password protected system which consists of 7 sampling pumps, and RFID tagged tamper-proof sample vials. It comes in the form of a box which is mounted on the milk tanker, and functions to automatically collect BMC milk samples, record milk quantity (through magnetic flow meter) and milk temperature (through inbuilt temperature sensor).

Milk Quality Testing Equipment

Fat'omatic

India's First Fully Automatic & Indigenous Milk Fat Testing Machine available since 1999.

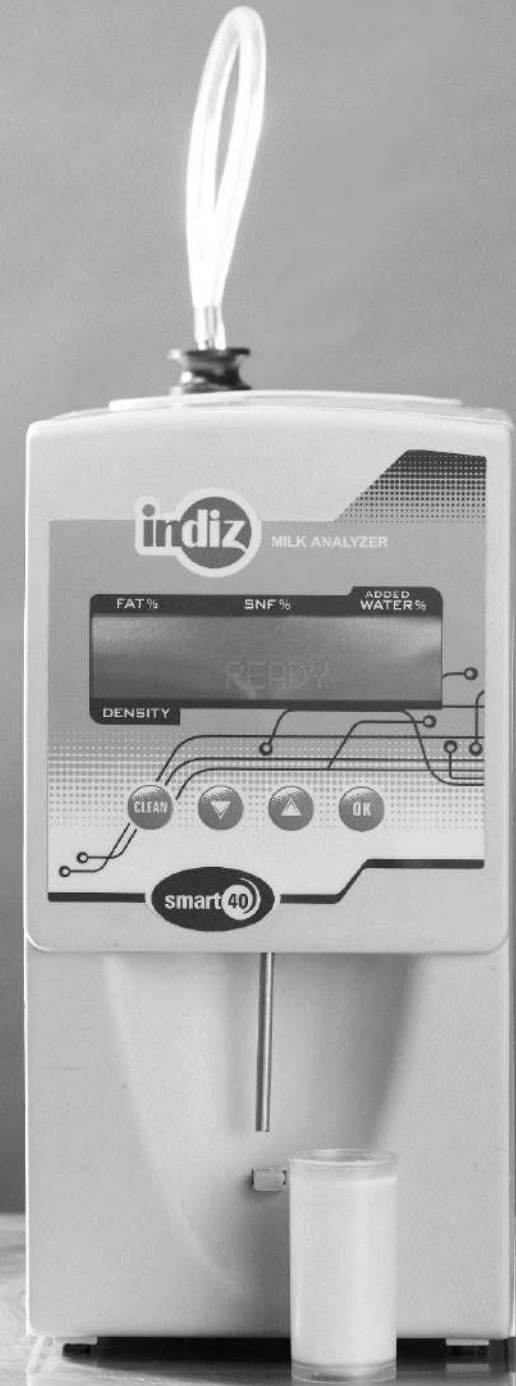

The Fat'omatic is a patented milk fat testing machine that is fast, accurate, economical, and measures 250-280 samples an hour. Fat'omatic ensures that the quality of the milk is uncompromised in a high throughput environment.

iSmart Milk Analyzer

India's First Smart and Indigenous Milk Testing Equipment.

Ultrasonic based iSmart Milk Analyzer measures and records milk fat, SNF, added water and milk density. This milk testing equipment has inbuilt features like power-on-self-test, 'App assisted' online central calibration and ensures accuracy of readings. The system ensures transparency and optimum earnings to farmer and dairy.

MilkoCheck

A calibration checking service that provides a set of four samples that imitates the milk properties in order to check the calibration of any make of Ultrasonic Milk Analyzers. The set of four bottles have liquid samples similar to milk with various FAT and SNF levels.

The calibration checking service has a unique mobile application that extracts the results of actual testing done through image processing, validates the genuineness of a sample and declares the status of calibration.

High-end Equipment for Milk & Milk Quality Testing

FOSS products for Quality Control and Quality Assurance of Milk & Milk Products

- The Milkoscan range Quality & Milk Adulteration testing
- Bacsomatic for Bacterial & Somatic Cells
- NIR range for Dairy Products quality monitoring
- ProFOSS process monitoring solutions
- FoodScan for monitoring of dairy products viz. butter & cheese

Analytical Weighing Solutions

Weighing Scales and Analytical Solutions

We provide end-to-end weighing and packaging solutions to meet the needs of small, medium and large industries. Our products are now efficiently working in many successful enterprises.

Checkweigher Solutions

The checkweigher is deployed in the packing lines of Food Industry and other industrial applications. It enhances packing accuracy and reduces product give away.

Automatic Bagging System

This Automatic Bag Filling and Sealing System is widely used for granule packing optimizing the packaging throughput.

Its self-optimizing controls can be precisely configured to specific material flow, speed & accuracy requirements. It has a capacity to process upto 14 bags per min (25 -50 Kg Bags) thereby improving the operational cost and productivity.

The Pursuit of Purity

It has always been our constant effort to work under our unifier of "The Pursuit of Purity' which stands for the never-ending journey to provide thoughtful product interventions that help in keeping the purity of milk intact at each step. We are proud to be a part of this revolutionary journey.
